

## NDEWS Sentinel Site Report, November 2023: What have you heard about 2FDCK (2-Fluorodeschloroketamine) in your area?

### Seattle, WA: Jason Williams, PhD & Caleb Banta-Green, PhD, MPH, MSW

Our site has had what is labeled as deschloroketamine appear in drug checking samples and a death investigation in October 2021, which also included benzodiazepines and fentanyl. The 2-fluoro variant does appear in a state crime lab case in September 2020, in powder form.

### National Survivors Union:

#### Caty Simon

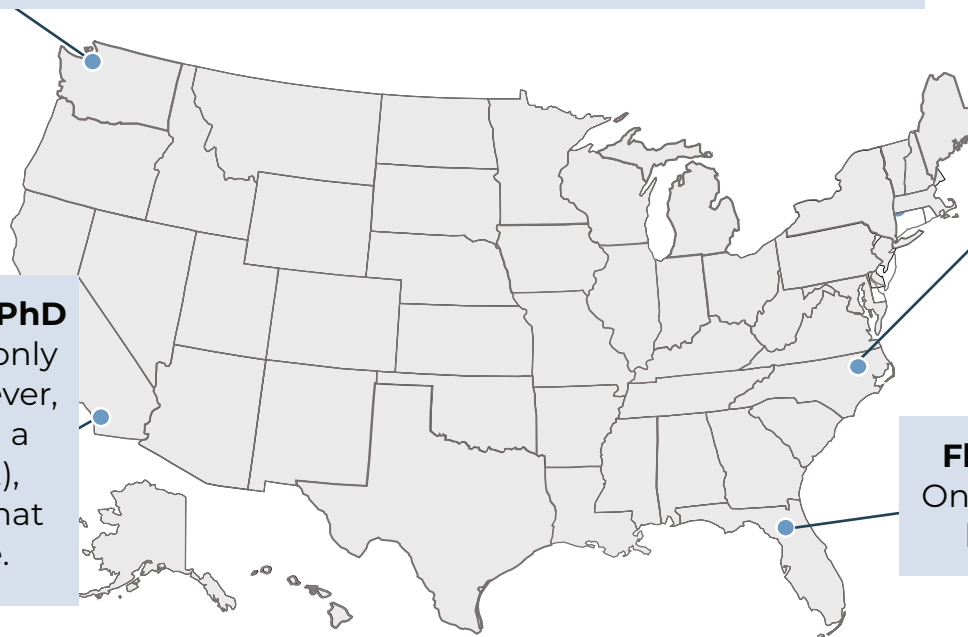

2FDCK has appeared in FTIR testing of opioids in North Carolina.

### San Diego, CA: Annick Borquez, PhD

The drug checking program has only seen one sample of 2FDCK. However, they have recently encountered a sample of Fluorexetamine (FXE), which is a arylcyclohexylamine that has similar effects to ketamine.

### Florida: Bruce Goldberger, PhD

One fatal overdose in South Florida has tested positive for 2FDCK.
