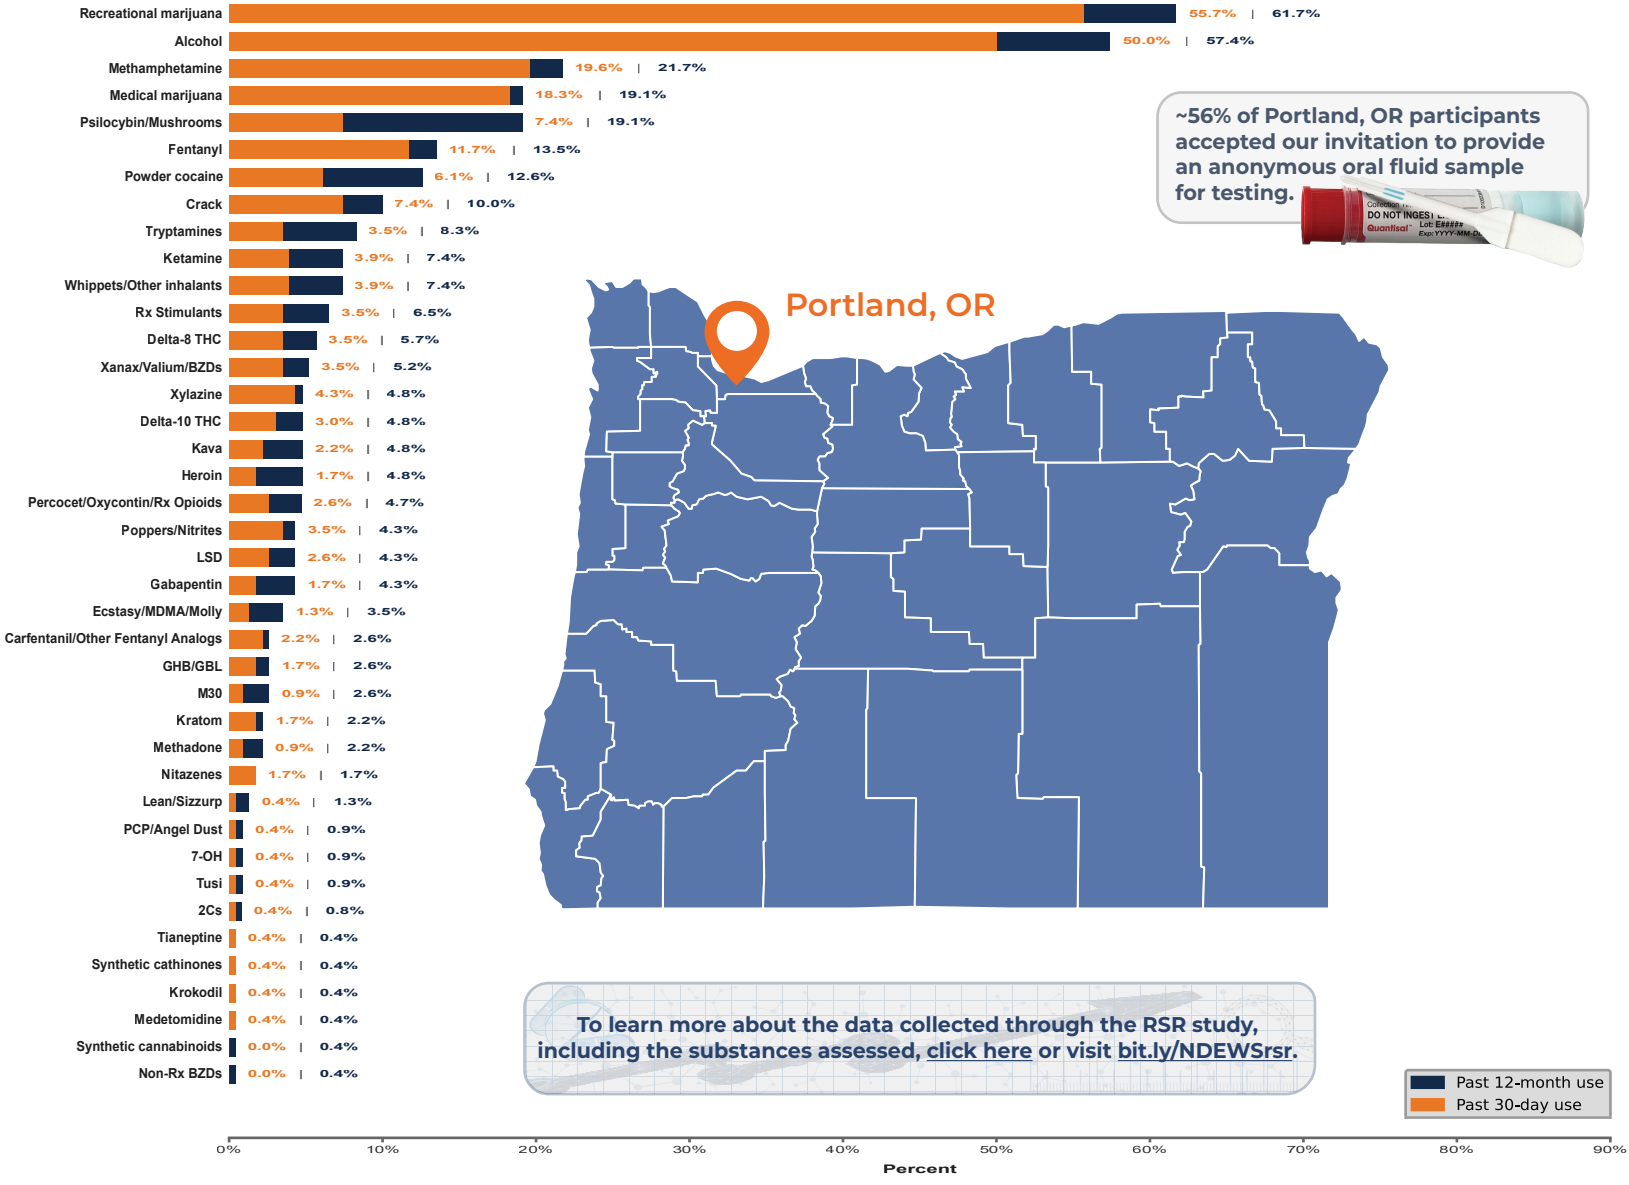
Self-reported substance use in the past 12 months
Portland, Oregon
Survey dates: June 12, 2026 – June 13, 2026
n=230

Published in NDEWS Weekly Briefing Issue 302: September 11, 2026

The Rapid Street Reporting (RSR) team visited Portland, OR from June 12 to 13, 2026 and anonymously surveyed 230 individuals. After marijuana for recreational use (61.7%) and alcohol (57.4%), the next most commonly reported substances used in the past 12 months were methamphetamine (21.7%), medical marijuana (19.1%), psilocybin/mushrooms (19.1%), fentanyl (13.5%) and powder cocaine (12.6%).



~56% of Portland, OR participants accepted our invitation to provide an anonymous oral fluid sample for testing.

To learn more about the data collected through the RSR study, including the substances assessed, click here or visit bit.ly/NDEWSrsr.
